

THE WORLD OVER

EDMONTON TO ASK FOR LOAN

EDMONTON—Request for a Dominion government loan of \$500,000 to assist Edmonton in its temporary financial needs will be brought before federal officials by Hon. J. G. Gardiner, Minister of Agriculture, on his return to Ottawa. It was announced here Saturday by Mayor Clark following a conference with Mr. Gardiner.

CHANT, GARDINER CONFER

EDMONTON—Hon. J. G. Gardiner and Hon. W. N. Chant, federal and provincial ministers of agriculture, respectively, met on Saturday on administrative details of the agreement between the two governments in respect to the feed and fodder situation. H. A. Craig, deputy minister of agriculture for the province, also took part in the discussion.

INJUNCTIVE POLICY UNDECIDED

EDMONTON—Future action of the Alberta government in regard to the injunction, which Chief Justice of the Supreme Court of Canada will be determined this week, it is expected. In the absence of Hon. J. W. Hullig, attorney-general, from his office on Saturday, no decision in the matter has yet been reached.

PRIMROSE TAKES OATH THURS.

EDMONTON—Col. P. C. H. Primrose, of Edmonton, newly appointed Lieutenant-Governor of Alberta, in which post he will succeed Mr. W. J. Walsh, will take the oath of office today, it was announced here by acting Premier E. C. Manning. The oath of office will be administered by Hon. Horace Harvey, Chief Justice of the Appellate Court of the Supreme Court of Alberta.

SAVINGS CERTIFICATES TAKEN

EDMONTON—Provincial savings certificates, payment on which has been suspended for more than a year, titles for University of Alberta students fees due as of a mailing statement, A West announce here Thursday.

Acceptance of the non-negotiable, non-transferable certificates is being limited to students who directly own certificates that have already passed their maturity date, it was said. Certificates owned by parents or relatives are not being honored, the bursar stated.

TOP-SIDED TRADE

William Halals, manager of the Alberta Co-operative Wholesale, is keenly interested in developing purchasing from British co-operative sources. At a recent meeting of the board of directors, he advised that British co-operatives annually buy to the extent of 16 million dollars from Canada, whereas the amount purchased by Canada from British co-operatives was insignificant. British co-operatives have developed considerable reciprocal trade with the U.S.S.R. and other countries, and it is likely that

SOCIAL CREDIT GROUP RE-ELECT OFFICERS AT MEETING ON SEPT. 16

A meeting of the Carbon Social Credit group was held in W.A. Braisher's store on Wednesday, September 16, and an attendance of 35 was recorded.

It was decided to re-organize the group, elect officers for the ensuing year and merge with the Social Credit League of Alberta. The following officers were elected:

President, W. A. Braisher;
Vice-President, H. W. T. Oive;
Secretary-Treasurer, V. B. Hawking;
Executive Committee President, Vice-Presidential; Vice-President, W. R. Evans, and J. F. Ohlhausen;
Auditor, H. A. Evans.

It was decided to hold meetings each month and the meeting night was set as the Tuesday after the full moon. A total of 12 meetings of this kind were tendered to the retiring President, Mr. A. R. Fuller for his services or the cause of Social Credit during his term of office.

CROP REPORT SEPT. 24

General—Thrashing throughout the Prairie provinces is now practically completed except in the northern districts of Alberta. The grain generally high and quality good. The preliminary estimate of the Dominion Bureau of Statistics places the wheat yield at 1.5 bushels per acre and 600,000 bushels. In Quebec crops are generally good and harvesting is proceeding under satisfactory conditions. In Ontario showers have been beneficial to seedlings, roots and late frosts. In British Columbia good and safely harvested. The grain is of average, the late crops are progressing satisfactorily.

Alberta—Thrashing is nearing completion, except in the southern prairie where rains have delayed operations. Wheat yields vary from poor to fairly good, with pastures generally light. Coarse grains on the whole will light. Rape pasture has been improved by recent rains. Sugar beets crop promise a normal yield.

Such mutual trade arrangements will be greatly extended in the future to the disadvantage of Canada unless the latter can compete on a basis of cost.

Of course, when it is the big commodity that the British co-operative organizations buy in Canada, the C.W.S. (Co-operative Wholesale Society) have eight flour mills and are about to open a large new mill at Victoria Park, London, with a daily capacity of about 5,000 barrels and with a storage capacity of around 50,000 tons.

WILLIAM WRIGLEY COMPANY TO GIVE FREE INSURANCE

All employees of the Wm. Wrigley Co., who have seen three or more months service with the company will be given gift insurance according to their rank and ranging from \$300 to \$1,000.

This insurance is given without medical examination or age limit. Benefits are to be paid immediately upon death or in the event of permanent disability resulting before age of sixty. If the employee terminates his connections with the company he may, within thirty days, assume the insurance himself. The entire cost of the insurance is being borne by the Wrigley Co. and is in force for all employees Aug. 1.

These conditions, the minister stated, included the issuance of special antelope licenses to be secured from the Royal Canadian Mounted Police.

Antelope hunting being subject to certain conditions.

YOU can cut Dixie coarse or flake just as you like it. It's economical, too, for you cut it only as you use it—there's no waste.

DIXIE

PLUG SMOKING TOBACCO

Requisites For Safe Driving

The summer just passed has produced the usual crop of automobile accidents to drivers and passengers in the three prairie provinces. The daily newspapers have duly recorded numerous accidents together with the names of killed and injured and, when the information was available, the causes of these frequent disasters.

It is yet too early to record figures detailing the number of accidents and the total of dead and injured. These will be available later, but indications are that there will be little, if any, reduction below the 1935 record despite the safety first campaigns which have been waged by governmental authorities, automobile clubs and commercial organizations interested in the subject, through the public press, over the air, and through motion picture presentations.

It does not necessarily follow that such campaigns are a failure, but it seems to indicate that public memory is short lived or that the capacity of automobile drivers to avoid accident, no matter how well-intentioned or how careful they may be, is brief. The latter is probably a close approximation.

Statisticians and experts working on figures and available data on the causes of automobile accidents in the United States last year came to the conclusion that the number of accidents arising from defective equipment or faulty mechanism is comparatively insignificant, from which it follows that the human element, the capacity and carelessness of the driver, is in the majority of cases, the factor mainly responsible for disasters on the highways.

In other words, a large percentage of automobile accidents can be reasonably attributed to lack of training or lack of experience on the part of the drivers and passengers in either one or both of the two. This statement does not take into account accidents which can be charged up against recklessness, alcoholism or criminal negligence.

Undoubtedly lack of training and lack of experience are the causes of a number of crashes and the opinion is gaining ground that a substantial percentage of accidents is caused by drivers who are ordinarily careful but who, sensing a pending risk, are not skilful enough to resort to the proper course to follow in time to prevent disaster.

In view of these conclusions there is much to be said for the adoption of measures of training for those who drive motor vehicles and for the issuance of driving tests. This should be followed by examination of applicants for operators' licenses for the first time, though it would not be feasible to insist on making such tests the sine qua non for the right to drive for those who have previously been granted licenses. Courses of such a nature, if properly carried out by competent persons would at least partially overcome the lack of training.

As for accidents caused by lack of experience, these can only be overcome by experience, supplemented by instruction. That drivers can and do develop a form of road sense which warns them of impending danger is the testimony of Oliver Stewart, writing in a recent issue of The Observer of London, England. He maintains that such an instinct can be developed by the driver who takes the trouble to learn what to look for. The writer explains that in course of time a driver learns to interpret small signs which to a novice would pass unheeded. "A driver on a main road about to pass the entrance to a side road, suddenly slows down. No other vehicle is visible; yet as he reaches the side turning, a motor bicyclist comes from it and dashes into the main road. If the driver is questioned as to the reason, he shows down before any other vehicle was visible, he will probably say: 'It's intuition.'

To Mr. Stewart that is not altogether a satisfactory explanation. He pointed out that in all probability the driver unconsciously registered some sign that someone was running down the side road, a pedestrian turning, a dog barking, that direction or a flock of sparrows taking to flight from the ground or some other indicator.

"The swift interpretation of such things," says Mr. Stewart, "is road sense and it is acquired with practice; but it is much too rarely taught. At first the signs will be seen, but not interpreted; and, in the absence of specific instruction, it is only with long practice that the interpretation can be expected to come without delay."

House Strange Collection

Many Interesting Curios To Be Seen In Private Museums

Charles Q. Eldredge, veteran world traveler, who is the sole owner and curator of the Eldredge free museum at Old Mystic, Connecticut, which boasts of more than 7,000 items collected in his 30 years.

Early in life Eldredge developed a mania for collecting things, and in 1917 he erected a separate building for his trophies and opened his free museum. From that time until now 60,000 persons have viewed the collection, while Eldredge himself has personally conducted 25,000 tours through the building.

The collection is a fond of entertaining as it is of collecting curios. He displayed his love of entertaining friends in 1891 when he returned to Old Mystic after engaging in the building business for 20 years. He built a large recreation center which he called Riverview. Hundreds of guests from Connecticut and neighboring states have used his boy scouts, meeting galleries and other amusements.

The museum houses as strange a collection as has ever been assembled. In front of it rests the bleached skeleton of a man who died after a gift of Captain C. S. Sperry of Groton, Conn., who caught it in Hudson Bay in 1879.

An ostrich mounted on the wall, not under the floor. It comes from Cape Horn and the card around its neck is typical of the labels Mr. Eldredge has placed on the exhibits. The card reads: "I am sure that you will like this ostrich. It is a bird of the Bible, so you will remember that somewhere it tells about those who have ears and hear not and eyes and see not. Well, here is a bird which has ears and sees not."

Eldredge takes great pride in his souvenirs from his natural history collection. He has what he believes is the first cannon ball fired against Fort Sumter, and he says it is Ed. Bullard's gun, the gun which fired that shot, also fired the last shot of the civil war. When he heard that Lee had surrendered he shot himself through the heart.

Some of his other prized items are a petrified coconut, which, he says, dates from 437 A.D. and was found during the digging of the Panama canal; a mummy which he believes to be that of a child, and which was the world prize for that sort of thing in 1934; a petrified oyster weighing eight and one-half pounds which was found in South Africa in 1865; a piece of wood from a Confederate gun at Gettysburg; some wooden hinges used on a barn door for more than 200 years; an almost complete set of all commemorative coins issued by the U.S. for the federal government; and several thousand postage stamps.

For Brighter Silver

Potato Water Is Said To Give It Extra Sparkle

Few people know that if silver is polished while it is hot the work is halved and the resulting brightness doubled!

It is worth while to plan washing up with this in view.

Take a potato, scrub it clean, spear it and cream jug to the last,

pour a little fresh hot water into the basin and wash up the silver, drying before the water has time to cool down.

Another queer and little known tip for silver is this: To give an extra sparkle for a special dinner party, soak it for a moment in the water that the potatoes were boiled in. Dry it while still hot and the result will be amazing.

SELECTED RECIPES

DATE MUFFINS

$\frac{1}{2}$ cup shortening
1 egg
2 cups flour
3 teaspoons Magic Baking Powder
 $\frac{1}{2}$ teaspoon salt
 $\frac{3}{4}$ cup milk
1 cup dates, peeled and chopped
Cream shortening, add beaten eggs, in which baking powder and salt have been sifted, and milk. Add dates. Bake about 25 minutes in greased gear pans in moderate oven at 400 degrees F.

For sweet muffins sift $\frac{1}{4}$ cup sugar with dry ingredients.

Teacher—"Johnnie, you must bring a written excuse for being absent yesterday, from the head of your family."

Johnnie—"She's away on a fort-night's holiday, ma'am; shall I bring one from my father?"

Publix in Scotland have to get through about three times as many books, in the school year, as do London school children.

Great Britain is standardizing all brass foundry products.

Women in Banking

New, If Any, Hold Positions Of Responsibility In Canada

Very few, if any, Canadian women hold positions of responsibility with the banks. It is a field in which women have not been able to stave off the feminine onslaught into the business world.

But in the United States, the number of lady bankers is sufficiently great to warrant an association of their own—the Association of Bank Women. This group will convene about the middle of October, just before the convention of the American Bankers Association.

Offices held by members of the association's roster run the entire gamut of banking, from branch presidents to secretaries, vice-presidents, cashiers, trust managers and managers of departments such as exchange, collection, publicity, savings.

Taking More Medicine

The growing consumption of medicine in England is worrying Sir Henry Royce, the motor engineer. "We are rapidly becoming a nation of medicine drinkers," he said in a speech to the House of Commons. The cost of medicine per head in England, he said, is double that in Scotland.

May Increase Duty

Britain Likely To Get Revenue From Foreign-Made Flags

Foreign-made flags, pictures of the Queen and other emblems suitable for the coronation may be subjected to higher import duties.

Increases are being considered on articles for use in or commemorating the coronation, or as souvenirs to mark the re-opening of the King or any member of the royal family, any royal emblem, or bear a flag of any country in the British Empire, or are in any way suitable for the coronation.

An improvement in the gear wheels of dial telephones now permits them to live through 5,000,000 operations instead of 100,000 as formerly.

Producing New Paper

Russian Scientists Claim It Will Last 1,000 Years

A new brand of paper—so strong that it will "last 1,000 years"—has been invented by scientists at the Leningrad laboratory of preservation and restoration of documents, it is claimed.

The formula for the paper was discovered as a result of studying Egyptian and other ancient kinds of paper.

According to the director of the laboratory, Professor Tikhonov, production of the new paper will cost no more than the manufacture of ordinary paper.

The groundhog and the woodchuck are the same animal, the former name being given to the animal in the eastern states.

I MAGINE AN "A" BATTERY which didn't have to be re-charged peak to the very end.

And imagine that this battery gave perfect service not for just two or three months but for 1000 playing hours.

Wouldn't you jump at the chance of having such a marvel in your own set?

The opportunity is yours! Your dealer has just such a battery. It's called Eveready Air Cell and does everything the ideal "A" battery—and should do. It actually maintains itself by simply breathing air—and its power scarcely fluctuates for 1000 playing hours.

Rare Orchid Blooms

An orchid plant believed to be one of the rarest in the world is blooming in the conservatory of Hubert Dalton at Rumson, New Jersey. The plant was imported from the Orient a total of 300 flowers on four spikes, each about three feet long. Two orchid experts inspected the plant and said that it was the only one of its type they had seen. The orchid is believed to be native of the Molucca Islands and Malaya.

— A NOVEL BY —
GEORGIA GRAIG

CHAPTER VI.—Continued

"I know a few desert songs, too, Hassan," Starr told him. "The English words."

Michael grimmed as he had every time she had called him "Hassan" since the first time. That fitted in, too.

"What could be sweater?" he asked. "Please up to the stairs and I'll assign you to a room—should be Suleika, or something of the sort, but we'll skip that since you insist on your own." . . . May she thought to be an Arabian serving woman, with her dark hair in a purple handkerchief over her head? "They're dirty," Starr said. "Any way, I can wash my own back."

There were some interesting times during the next few days when they found and fitted up an apartment which should be the home from which "Play-Girl" would burst upon New York cataclysmically. Every morning she could look such joy in marching into the smartest dress shop and merely making known her desires, when some sinuous mankin paraded before her, to show off the power of the latest clothes that even warmed any girl's heart.

There were a few other interesting moments, not quite so happy ones, when she went back to Mrs. Maloney's for her pension. She was getting some new clothes, of course, and such clothes! but there were a few cherished treasures at the Maloney place with which she did not want to part, even if she could hold onto them for only six months.

The laundry was all smiles and expansive when Starr paid her bill in full.

"My head feelings, I happen, Miss Ellison," she purred, "and I sure hated to look up your clothes like that, but it's like I was telling you, you can't—"

"It's no consequence, Mrs. Maloney," Starr assured wearily, as she moved by her to climb the steps to her hall room.

Mrs. Maloney, folding the bills to tuck inside her ample bosom, bowed.

"Well, you'll find everything okay, Miss Ellison," she insisted. "You got clean curtains, an'—"

"Oh, did I forget to mention that I would no longer be needing the services of a maid?" she replied over her shoulder, but did not pause.

"You ain't? Where you think you're goin', Miss—the Waldorf?"

Starr sank down on her from the top of the stairs.

"No—" She shook her head. "I've taken a suite at Essex House while I'm furnishing my new apartment. It's quite comfortable."

Miss Maloney's eyes bulged. "You young'uns!" she cried.

Starr arched wryly and her slight shoulders shrugged.

"From far I—I'm taking a penthouse."

Her master fandily glared, and her lips set tight. She opened them to snap:

"So it's like that, is it? I just goes to show you never can tell. . . . Ah, there I was thinkin' you was a nice young'uns."

Starr let her go, did not make any attempt at explanation. But she was smiling oddly as she went on to do her packing. Let the woman think what she chose. It was of no concern, any more, to her than anything else. Besides, this was good practice in the new role she was to assume.

Just in episode, Starr forgot, in the excitement of having lunch with Michael Fairbourne and then going on to an art gallery that specialized in paintings of ancient Egypt. There were incense burners of various humors and consultations, of necessity. At each one Starr was beginning to wonder if, in seeking a panacea for one hurt, she might not be causing another. Michael, however, was astutely impersonal in all his dealings with her, but that had nothing to do with the quickening of Starr. Ellington's own heart.

If only she weren't so virgily good, her role would be so much easier. For, try to put it from her all she could, knowing that never must her heart give a third of love from herself how quickly she was responding to the magic clearness of his gray eyes. And, although the strength of his tall, athletic figure which he carried with

"I'm glad you don't want me to wear it when I'm out of the house."

Star's smile was a more modern note. There were touches of Egypt there, too, notably in the style of exquisite enamel antique necklaces and bracelets which were held in her hands. Her jeweled bracelet was a long table, but the whole apartment was equipped as the boudoir of any New York debutante, with its great bed of rose silk and silver lace, the white sofa, the low, curved chaise longue and all the accoutrements necessary for aid in making a lovely woman all the more lovely. Through the open bathroom door the steam from the tub could be seen rising. In the wall above it was painted a representation of ancient Egyptian bathing beauties, disporting themselves in a lotus-decorated tub.

A tray from Mrs. Maloney's hall bedroom.

Odd that the first thing that Starr Ellison should do when Michael Fairbourne left her alone in her new home was to turn to that great bath sink her bare head into its sides and leave pillows and cry, and cry, and cry.

Michael had done his preliminary work thoroughly. The Tarrant Publishing Company, too, had spread themselves, sparing no expense for their de luxe press stunt.

(To Be Continued)

Due To Physical Changes

Reason For Increase In Blood Pressure

The rise in one's blood pressure is not due to the exercise itself but to physical changes, Prof. R. J. S. McDowell, president of the physiology section, said in a paper read at a meeting of the British Medical Association in London.

Exercise could be taken without psychical rest being required, without the exercise itself but the exercise was being taken—the blood pressure probably would fall, he said. This had been found to occur in horses.

Explaining that when people exercise their blood pressure rises but falls even below normal when the exercise stops, Prof. McDowell said this had been explained as due to the acceleration of blood in the muscle tissue.

His observations led him to believe this theory was not wholly correct. He found the fall was due at least in part to a lessening in the tone of the small muscles hardened during the exercise.

On one occasion in Birmingham, England, he just received orders for 20,000,000 British flags to be used during the Coronation next year.

On Geranium Day in England \$42,500 was raised for the blind.

Other important organizations will be interested to read this later.

Until last summer I was subject to very bad headaches. While they were not severe, they were constant and all power in my hands, and was forced to lie down for hours at a time. I took Krushein's Headache Salts for 12 years with beneficial results.

Trade Revival In Britain

Number Of Unemployed Reaching Lowest Mark In Years

Great Britain now has a record industrial army. Executive of agricultural workers the number of persons employed totals 10,961,000, the highest known.

During the four weeks ended Aug. 24 the total number of unemployed fell by 38,132 to 1,613,940 and 334,024 fewer than a year ago, and also was the lowest figure in six years.

Trade revival is reflected from many angles. The biggest theatre season for seven years has begun in London.

A boom in apartment building has begun. In all the great centres of population huge blocks are rising with accommodation ranging from 100 to 200 flats in each apartment.

The small flat is popular, and the retired couple wishing to escape the responsibilities of a house.

Economical Housewives

There was a day when the housewives bought the faraway "bargain" in the belief that it was good business to save a few pennies. But experience taught them a few things. Today's housewives do not buy blindly. They examine the article first and when satisfied with the product they pay a fair price at home. It is economical to make your purchases in CARBON

THRESHMEN'S EXPENSES

I've roamed around this world a bit.
I've tramped from coast to coast;
I've eaten different kinds of grub,
From mush to turkey roast.I've heard the steady tales of men,
The most consequences,But there's one man—the only man
Who never makes expenses.From Edmonton to Calgary
From there to Saskatoon

I've plodged the C and Rumley,

The night of the silver moon;

And never been to Calgary,

Where the wheat is always densest.

Even there they never seem

To make their blimped expenses.

And while this bird that grabs the

world still sleeps in bed;

With the car lights on the fender,

I've fed the thrasher head.

For fifteen hours the straw would

blow.

Over the pasture fences;

And even then I'll bet a buck

We'll get the last of the grain.

So when this thresher grind is done

And we leave it all behind,

Perhaps within the promised land

Some threshmen I'll find

When the season's payday comes

Employs no fair pretenses,

But pays me with a smile and says,

"Well boy, we made expenses!"

A sergeant was making his way
about his platoon one dark night. He
heard the roar of a G. I. can overhead
and dove into a shell-hole. It
was occupied by a private who
was hit full in the stomach by
the sergeant's head. There was a long
tense moment of silence, except for
some long, deep breathing. Finally
the private asked:

"Sir, that youarge?"

"It's all right."

"Hot dawg! I was just waiting for
you to explode."M.O.:—Now, sergeant, I am con-
cerned as to the quality of the drink-
ing water. What precautions do you
take against infection?

Sergeant:—Then we filter it.

M.O.:—Excellent.

Sergeant:—Then we drink beer.

The old Indian was riding along the
road on his pony, while his squaw rode
along on foot, heavily burdened with
luggage."Say, Redskin, why isn't your wife
riding?" asked a passing motorist.
"Ugh," answered the Indian, "she
got no pony."

THE accumulated assets of the life insurance
policy-holders of Canada are the largest—by far
the largest—single class of investment holdings in
the country. They include every type of non-
speculative investment, but owing to the nature of
the insurance contract, the greater part of them con-
sists of credit claims against property, with prin-
cipal and interest payable in fixed dollar amounts,
rather than ownership equities whose value and
income depend upon earnings. The owners of these
investments are only nominally the insurance com-
panies themselves, some of which are wholly mutu-
al, and all of which administer total funds in
which the shareholders' proportion is an almost
infinitesimal part; the real owners are the policy-
holders themselves. And in spite of the existence of
a fair number of very large policies which may be
regarded as a class of rich men's investments, the
typical policy holding is a matter of a few hundreds
or thousands of dollars, the chief asset and the meta-
phorical anchor to windward of some industrial,
commercial or professional worker who has not
commercial and never will accumulate any other
important asset.

No act of destruction or partial destruction of
the value of any such credit claim, be it a govern-
ment bond, a municipal bond, a public utility bond,
a railway bond, an industrial bond or an ordinary
property mortgage, can ever fail to impair the assets
of the life insurance policy-holders of the country.
Any widespread destruction of such values must
necessarily render the assets of the policy-holders
inadequate to perform the function for which those
policy-holders rely upon them. The same is true of
any tampering with the value of the unit of currency
in which these credit claims are expressed. Policy-
holders who have any real regard for the interests
of their beneficiaries—the women and children for
whose benefit the vast majority of life insurance
policies are taken out—would set their faces immut-
ably against all government tendencies leading to
partial or complete repudiation of debt contracts, for
such tendencies are destructive to the whole system
of insurance.

The object of insurance is to make something
sure. The effect of repudiation is to make everything
unsafe.
